

## ***Improving Literacy & Improving Lives!***

### **Student Data**

#### **Results of Pilot Study Conducted by Michigan State University in conjunction with New Century Education Foundation**

Eight middle school students with reading challenges (seven identified with dyslexia) showed improvements in reading after using Noah Text® for just **two weeks** during a summer reading camp. Specific results were as follows:

- All students made **fewer mistakes** reading Noah Text® versus standard text
- Seven of the eight read more words per minute using Noah Text® versus standard text passages (**15 more words per minute on average**)
- The students gained an average of **22% in oral reading fluency\***
- They achieved an average percentile gain of **3.9% in reading comprehension\***

\*Based on DIBELS assessments at the fifth-grade level

### **Educator Reports**

#### **Educators' Report, Assessment of Noah Text® by Orton Gillingham- and Wilson-trained Teachers. Compiled by Rhode Island Tutorial & Educational Services**

While and after using Noah Text® with students, teachers observed:

- **95.7% of students showed increased fluency/accuracy**
- **87% of students showed increased stamina/endurance**
- **73.9% of students showed improvement in reading comprehension**
- **All students learned to use the text quickly**
